COOKIE Test report

Patient: COOKIE Species: Feline Patient ID: 2511016

Client: BANAL Gender: Female Age:

Al Aided Diag. Explan.

It is recommended to add a blood smear test to evaluate white blood cell morphology, as well as tests of liver and kidney panels, electrolytes, protein level, and inflammatory markers (such as cCRP and fSAA) to assess overall health status or inflammation level, based on clinical manifestations and medical history.

It is recommended to add a blood smear test to evaluate platelet and other cell morphology, as well as coagulation (such as cD-dimer) to assess whether coagulation function is normal, based on clinical manifestations and medical history.

Note: Due to the complexity and individuality of disease diagnosis, the report interpretation is only for your reference. Please consult your doctors for clinical diagnosis results. The results only applies to this test sample.

Hematology Analysis Report

Patient:COOKIESpecies:FelinePatient ID:2511016Client:BANALGender:FemaleSample No.:07

Doctor: Age: Time of analysis: 2025/11/01 15:53

Diagnosis implications:

Leucocytosis
Thrombocytosis

PLT Clump

Neutrophilia

WBC Scattergram Abn

Monocytosis

Band cell suspected

目 Report Explan.					
Leucocytosis	Decytosis It occurs in bacterial infection, burn, post-operation, malignant tumor, leukemia, etc				
Neutrophilia	It occurs in stress response or corticosteroid response, inflammation, granulocytic leukemia				
Monocytosis	It occurs in stress response or corticosteroid response, bacterial/fungal/protozoal infections, immune-mediated diseases, paraneoplastic reactions (such as lymphoma), monocytic leukemia, etc				
Thrombocytosis	It occurs in reactive thrombocytosis, such as chronic inflammation, immune-mediated anemia, drug treatment, and iron deficiency anemia, or it occurs in neoplastic thrombocytosis				
WBC Scattergram Abn	The DIFF scattergram may be abnormal due to abnormal lymphocytes, immature granulocytes, blasts, etc				
Band cell suspected	Possible presence of band cells and/or toxic neutrophils, and it occurs in infection and inflammation				
PLT Clump	Possible presence of PLT clump, and it occurs in difficult blood collection, anticoagulant-dependent thrombocytopenia				

Note: Due to the complexity and individuality of disease diagnosis, the report interpretation is only for your reference. Please consult your doctors for clinical diagnosis results.

The results only applies to this test sample.
