| Doctor:  | DR. LOVELY TAN | Age:     | 7Months | Time of analysis: | 2025/12/26 14:10 |

**Diagnosis implications:** Leukocytopenia

Neutropenia

Lymphopenia

## Report Explan.

|                       |                                                                                                                                                                                                                                                                                                          |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Leukocytopenia</b> | It occurs in virus infection, parasitic infection, aplastic anemia, agranulocytosis, etc                                                                                                                                                                                                                 |
| <b>Neutropenia</b>    | It occurs in particular animal breed (such as Australian shepherd and Labrador retriever), infection (such as parvovirus and ehrlichia), drug treatment (such as estrogen, phenylbutazone and phenobarbital), immune-mediated disease, myeloma (such as leukemia, lymphoma and histiocytic sarcoma), etc |
| <b>Lymphopenia</b>    | It occurs in stress response or corticosteroid response, viral diseases (such as parvovirus), drug treatment (such as chemotherapy drugs and long-term use of corticosteroid), and lymphoid fluid loss (chylothorax and lymphangiectasia)                                                                |

Note: Due to the complexity and individuality of disease diagnosis, the report interpretation is only for your reference. Please consult your doctors for clinical diagnosis results. The results only applies to this test sample.
